Congratulations on your graduation from the University of Maryland! This milestone should bring great satisfaction to you, your family and friends. It is no small feat. I know that your feelings about your Maryland experience will blossom in the years ahead.

Your time at the university has been filled with new ideas, challenges and opportunities. You have probably discovered that the greatest learning comes from asking the right questions. The hardest questions, of course, have no "right answers," but they are important steps toward understanding. You will find this realization important in your life ahead.

The University of Maryland has offered you opportunities to expand your interests and horizons. I hope that you took full advantage of them and that they have opened your eyes and many doors, too. You have made friends and found mentors who will continue to add value to your life in remarkable ways.

As you leave us, I would like you to know how much the faculty and staff respect your accomplishments as scholars, artists, athletes and leaders. You have enriched our university's life and have helped Maryland climb to higher levels of distinction. We welcome you into the alumni family, a truly special group.

I hope that you will stay connected to us and take full advantage of the benefits of being an alum. Stay involved with us and help new generations of students develop their futures. You can do this by returning to campus often, starting with Maryland Day 2010 on April 24.

You have my very best wishes for all your future plans. We are proud of each and every one of you. Stay in touch. Go Terps!

Yours sincerely,

C. D. Mote, Jr.
President

Dear Graduates,

On behalf of the University of Maryland Alumni Association, I am thrilled to extend heartfelt congratulations to you upon achieving this academic milestone. Today, when you reach for your diploma, you will receive a torch—the legacy of excellence that Maryland alumni have carried for more than 150 years. Hold it high, displaying your Terrapin pride for all to see.

It is my hope that in the years to come you will shine your light on your alma mater by sharing your newfound expertise and ideas. In turn, Maryland will continue to educate the country's brightest students, pursue cutting-edge research, explore the arts and defend our athletic titles—we will make you proud to be a Terp.

Along with this commitment, the alumni association is pleased to give you a complimentary one-year association membership as a graduation gift.

Alumni association membership provides instant access to:

- social and professional networking events at the Samuel Riggs IV Alumni Center, your new home address at the university
- health insurance and financial services—tangible benefits designed to ease your transition into life after college
- access to TerpNation, an online social and career network exclusive to Maryland grads
- *Terp* magazine, connecting alumni with the university

Most importantly, it demonstrates your dedication to Maryland and those who will follow in your footsteps.

Best of luck to you and thank you for displaying your Terp spirit as you take your place in our alumni family. We look forward to seeing you soon at the Riggs Alumni Center.

Sincerely,

A handwritten signature in dark ink that reads "Danita D. Nias". The script is fluid and cursive.

Danita D. Nias '81

Assistant Vice President, Alumni Relations and Development

Talia Lewis

Talia Lewis came to Maryland planning to lay the foundation to become a pediatric oncologist. She leaves with an even more ambitious goal: tackling health-care inequities on a global scale.

She wasn't interested in an undergraduate degree in science, so with help from the university's Individual Studies program, Lewis created a bachelor's in health, culture and inequality studies. The Philip Merrill Presidential Scholar and University Honors student also earned a reputation as a passionate voice for people who can't advocate for themselves.

"The overarching theme of my experience at Maryland is that it really turned me on to social justice issues," she says.

Lewis attended a private, Jewish day school in a quiet Philadelphia suburb. She was attracted to Maryland because of its diversity: "I found that I had so much to learn from others."

In that spirit, she led an alternative spring break trip to Los Angeles. There, she and 15 peers volunteered at a homeless shelter and with an after-school program for at-risk youth. She also learned about family medicine and inner-city clinic work by shadowing a family doctor in Baltimore. Her senior thesis is on organ trafficking.

"I found out about it through an anthropology course," she says. "I am synthesizing the research I gathered in order to construct a public health approach ... to develop solutions."

Her eclectic mix of courses, such as organic chemistry and gender and globalization, led Lewis to conduct research in a Department of Animal and Avian Science lab and round out her experience as a founder of the Women's Jewish Alliance at Maryland. The student group held a conversation with Muslim women this fall to foster understanding and connect around their similarities.

Praised for her contagious energy, Lewis plans to study medicine somewhere that has a focus on international health and/or social justice. Her goal is to become a family doctor for underserved communities in America and abroad.

"Talia has a genuine desire ... to find ways to make a difference in the world," says Joan Burton, Individual Studies director.

James F. Pitts knows the tactical and business sides of defense technology. As a successful engineer, he holds several patents for electronic warfare techniques. As corporate vice president and president of Electronic Systems at Northrop Grumman Corp., he works with the Department of Defense and other federal agencies to develop equipment and systems for airspace management, navigation and communications as well as precision weapons.

He's spent his career at Northrop's Electronic Systems, which earns nearly \$7 billion in annual sales and has 22,000 employees in the United States and 19 other countries. The sector recently announced its funding of a fellowship for doctoral students in the A. James Clark School of Engineering.

Pitts graduated from the Johns Hopkins University with his bachelor's in engineering science in 1973, when he joined Baltimore-based Northrop Grumman's electronic warfare systems engineering sector, and returned four years later to earn his master's degree in electrical engineering.

He moved up the ranks at the company and was promoted to deputy general manager for the systems development and engineering division in 1990 and vice president of avionics systems the following year, making him responsible for product development and production for control radars on the F-16, F-22, B-1B and C-130 aircraft.

In 2001, Pitts was assigned to lead the Aerospace Division, where he dealt primarily with radar systems and most of the U.S. Army business within the sector. He was named to his current position in October 2005.

Pitts was named the Engineer of the Year in 2002 by the University of Maryland, Baltimore County's College of Engineering and Information Technology, and he serves as chairman of the Maryland Business Roundtable for Education and the University of Maryland, Baltimore County Board of Directors.

He previously served on the University of Maryland Board of Visitors and as vice chairman of the University of Maryland Medical System. Pitts has also sat on the Board of Trustees for the Maryland Science Center, the Governor's Workforce Investment Board and the Board of Directors for the United Way of Central Maryland.

A native of Baltimore, Pitts and his wife, Kay, have three children and live in Pasadena, Md.

The campuswide commencement ceremony will be held on Saturday, Dec. 19 at 7 p.m. at the Comcast Center, with graduation exercises for individual colleges and schools taking place on Sunday, Dec. 20.

Shuttle bus service will provide free transportation from the metro on Saturday evening and from the metro all day on Sunday.

Guests are urged to be seated approximately one half-hour prior to the designated time for the ceremonies if they wish to observe the student and faculty processional.

Maryland's Momentum

Expanding its reputation among the best universities in the world, Maryland boasted 29 programs in *U.S. News & World Report's* top 10 rankings in 2009. It was also No. 1 that year among the top 25 public universities in graduating African Americans, according to *Diverse Issues in Higher Education*. *Kiplinger's Personal Finance* ranked Maryland No. 9 among best values in public higher education.

We draw many of the best and brightest students from Maryland and across the country. This year, more than 28,000 students applied for 4,000 first-year seats.

Our faculty regularly earns national and international recognition for its excellence. Maryland currently has three Nobel laureates, seven Pulitzer Prize recipients and more than 40 members of the most prestigious national academies.

Maryland netted more than \$518 million in external research grants in fiscal year 2009, an all-time high. Among them was up to \$93 million for a Cooperative Institute for Climate and Satellites, a nationwide consortium led by Maryland and supported by the National Oceanic and Atmospheric Administration.

Great Expectations, The Campaign for Maryland has raised more than \$671 million. A priority goal of the \$1 billion campaign is to raise more than \$250 million for student scholarships.

The university, with its more than 7,500 trees, was designated an arboretum and botanical garden by the American Public Gardens Association and was the first campus in Maryland to be recognized as a Tree Campus USA by the Arbor Day Foundation. M Square Research Park continued to

grow, with the dedication in April of the Intelligence Advanced Research Projects Activity, the U.S. government's intelligence research headquarters. Other agencies coming to M Square to work with university researchers include the National Oceanic and Atmospheric Administration's new National Weather and Environmental Prediction Center and the Food and Drug Administration.

Construction is nearly complete at the John S. and James K. Knight Hall, the new home of the Philip Merrill College of Journalism. It opens in January. The \$30 million building will be the first "green" building on campus and will feature state-of-the-art classrooms, news laboratory spaces and professional training centers.

A Continuing Commitment to Excellence

From its pre-Civil War roots as the state's first agricultural college and one of America's original land-grant institutions, the University of Maryland has emerged as a public research university of national stature, highly regarded for its broad base of excellence in teaching and research.

Maryland takes full advantage of the unique resources of the nation's capital, attracting top students and faculty, enriching the economic, social and cultural life of the state and engaging the global community to address some of the most critical issues of our day.

Our student body of 26,500 undergraduate students and 10,500 graduate students comes to study

with a faculty that ranks among the finest in the nation, with three Nobel laureates, seven Pulitzer Prize winners and scores of Fulbright scholars.

The university also continues to move forward in the quality of our students and the support of our faithful alumni. Freshmen admission is increasingly competitive. We received more than 28,000 applications for 4,000 first-year seats in Fall 2009. Accepted students who complete their academic journey join a rapidly increasing family of alumni who are proud to be called Terps. University of Maryland Alumni Association membership has grown to more than 37,000 dues-paying members since its inception in 1989.

There are 13 schools and colleges within the University

of Maryland. Seven of these units—the Smith School of Business, the College of Education, the Clark School of Engineering, the Philip Merrill College of Journalism, the College of Computer, Mathematical and Physical Sciences, the College of Information Studies and the School of Public Policy—have been recognized by their peers and in various rankings as among the 25 best in the nation. The breadth of this excellence is a source of pride for students, faculty and staff and is endorsement for the university's flagship status among the state's institutions of higher education.

The university's location near the center of federal policymaking and international political and economic activity enables it to play an active role in research and analysis of public policy.

Our academic community is addressing today's most pressing scientific and societal challenges, such as climate change, the economy, energy, homeland security and public health. University research brought in more than \$518 million in external grants and contracts in fiscal year 2009, including support for a Cooperative Institute for Climate and Satellites and a brain imaging center.

As a gateway to the world, the university has established more than 200 educational, research and economic relationships with

people and institutions in countries such as China, India, Brazil, Israel and the United Arab Emirates.

The Maryland Technology Enterprise Institute, or Mtech; the University of Maryland Small Business Development Network; and the Dingman Center for Entrepreneurship nurture a culture of thriving entrepreneurship at the university. They are leading efforts to educate and assist business start-ups, create technology ventures and connect Maryland companies with university resources to help them succeed.

Through its Office of Technology Commercialization, the university has secured more than 300 U.S. patents, licensed more than 900 technologies and helped to create more than 50 high-tech start-up companies. Among them are award-winning firms that create alternative energy solutions, national security tools and data systems to protect against Internet viruses. Companies served by Mtech sold \$19.7 billion in goods and services over the last 25 years, more than 200 times the state's financial support.

Maryland is one of the research universities in the prestigious 61-member Association of American Universities and the only public institution in the Maryland-D.C. area with membership in the nation's most distinguished honor society, Phi Beta Kappa.

History

The University of Maryland was founded in 1807 in Baltimore as a faculty-owned College of Medicine. The medical school was considered one of the top schools in the country, attracting notable professors and lecturers from throughout the world. In its beginning, tuition cost \$140, grades were sent home weekly to parents, and students could obtain room and board for \$300 annually.

Five years later, the growing institution was renamed the University of Maryland. Despite the name, the university was not considered a state institution, as it was still owned and operated by faculty. The Baltimore College of Dental Surgery, the first dental school in the world, became a part of the university in 1840, awarding the country's first Doctor of Dental Surgery degree in 1841.

In 1859, the Maryland Agricultural College, which would evolve into the University of Maryland, College Park, was opened under a charter secured by a group of Maryland planters in 1856. In addition to spending one hour each day hoeing or plowing on the college farm, students took a broad range of courses in ancient and modern languages, natural sciences, English and mathematics. After a disastrous fire on campus in 1912, the state acquired the college and rebuilt it.

In 1920, the state legislature combined the College Park institution with the professional schools in Baltimore to form an expanded University of Maryland. The entity eventually grew to include campuses in Baltimore County, on the Eastern Shore and at University College, a continuing education institution.

The following decades saw the increasing growth of student population, excellence in programs and curricula and the burgeoning of the University of Maryland, College Park into a nationally recognized research institution.

July 1, 1988, marked the dawn of a new era in higher education in the state of Maryland, as the five components of the university were merged with six other state universities and colleges to form the University System of Maryland and College Park secured its flagship status with a mandate to become one of the preeminent research universities in the nation.

The Alumni Association

With alumni clubs from Miami to Taipei, Taiwan, the alumni association strives to keep and strengthen ties between the university and its graduates.

Member events such as pre-game parties, bull roasts, picnics, golf tournaments, dinner cruises and subscriptions to *Terp* magazine help keep alumni

connected to the university and each other. All graduating seniors and successful master's and doctoral candidates receive a one-year free membership in the Maryland Alumni Association.

Hall of Fame

The alumni association's Hall of Fame honors university graduates who have brought honor to their alma mater through distinguished careers in a variety of disciplines. The following 51 individuals have shown the world what it means to be a Terp.

Carmen Balthrop '71

World-class soprano

Adisai Bodharamik '70 Ph.D.

Telecommunications trailblazer

Waldo Burnside '49

Retail king

Maryland's first dean of women

Reginald Van Trump Truitt '14

Naturalist and Chesapeake

Bay advocate

Millard E. Tydings '10

U.S. senator

Evelyn Pasteur Valentine '67

M.S., '86 Ed.D.

Educator and entrepreneur

Gary Williams '68

Championship-winning coach

Morgan Wootten '56

Basketball Hall of Fame member

The Hall of Fame induction ceremony takes place once every five years. The last group of honorees was inducted in June 2005.

Golden Terps

The university has begun a new tradition to honor its 50-year alumni by creating a place for them in the spring commencement ceremony. Wearing gold robes trimmed in black and black tams, they follow the student marshals in the processional and sit with them.

Customs of Commencement

Early commencement ceremonies at the University of Maryland were marked with great fanfare and celebration. The faculty gave huge banquets for the graduates the night before the event. The

following morning, crowds gathered to watch the young graduates parade. It was a gala attracting not only friends and relatives, but also the fashionable elite of the day. At the ceremony, prayers were recited, speeches were made and honorary degrees were awarded to distinguished figures from across the country. Finally, as the audience cheered and threw flowers, the graduates came forward to collect their Latin-inscribed degrees.

Academic Costume

The black caps and gowns worn by the students and faculty in the academic procession have been the traditional costume of scholars since the Middle Ages. The ordinary dress of the scholar, whether student or teacher, was similar to that of a cleric. Caps and gowns were probably worn to keep students warm in unheated buildings. Many medieval scholars were tonsured, like monks and hoods served to cover their shaved heads until the skullcap later took its place.

Even after the Civil War, most students at American universities wore caps and gowns daily while in residence. These varied in design until the American Intercollegiate Commission standardized them in 1894. At that time it was decided that all robes would be black. Colors on the trim of the gown were also standardized to indicate the scholar's academic discipline.

A list of department colors follows:

Agriculture: Maize
Arts, Letters,
Humanities: White
Business Administration:
Commercial Science: Drab
Dentistry: Lilac
Economics: Copper
Education: Light Blue
Engineering: Orange
Fine Arts, Architecture: Brown
Forestry: Russet
Home Economics: Maroon
Journalism: Crimson
Law: Purple
Library Science: Lemon
Medicine: Green
Music: Pink
Nursing: Apricot
Oratory, Speech: Silver Gray
Pharmacy: Olive
Physical Education: Sage Green
Philanthropy: Rose
Philosophy: Dark Blue
Public Administration, Foreign
Service: Peacock Blue
Public Health: Salmon
Science: Golden Yellow
Social Work: Citron
Theology and Divinity: Scarlet
Veterinary Sciences: Gray

The tassel may also be colored to represent an academic discipline or it may be black. Officially, the tassel is permitted "to lie where it will" on the mortarboard. However, numerous institutions have adopted the practice of having degree candidates wear the tassel on the right front side at the start of the commencement ceremony

and then shift them to the left side after degrees are awarded.

Student Marshals

Elected through a nomination process, student marshals are senior leaders who play an important role in the graduation ceremony. Student marshals assist in organizing the thousands of graduates, leading them smoothly through the commencement procession. They also supply extra caps and hoods and bobby pins to keep headwear secure. Fall 2009 marshals are listed on page 72 of this booklet.

All-Student Gift

In recognition of the philanthropic spirit of Maryland students, the former Senior Class Gift effort has evolved to an All-Student Giving effort at the university. Traditionally, class gifts have included items, such as the bronze Testudo now sitting in front of McKeldin Library (Class of '33), sundial on McKeldin Mall (Class of '65) or the Henson Garden outside of the Stamp Student Union (Classes of '94 and '99). The new All-Student initiative encourages Terps to financially support the causes they believe in most—from the university's community outreach and partnerships to student groups conducting discovery and research to solve tomorrow's complex global issues.

If you would like to be a part of this tradition of philanthropy, visit www.mdexcellence.umd.edu or call 301.315.7749 for more information.

Academic Degrees

A degree is awarded for the successful completion of a course of study. The University of Maryland offers 99 bachelor's degrees, 108 master's degrees and 85 doctoral degrees.

The Doctoral Degree

The doctoral degree represents the most advanced earned degree conferred by American institutions. There are two distinct types: the practitioner's degree and the research degree. The first type represents advanced training for the practice of various professions, principally Doctor of Medicine, Juris Doctor, Doctor of Pharmacy and Doctor of Veterinary Medicine. These degrees do not involve the completion of original research by the student. The University of Maryland, at the professional school in Baltimore, awarded the first two dental degrees on March 9, 1841.

The University of Maryland conveys the Doctor of Veterinary Medicine to approximately 90 students each year in a program that was instituted in 1980. Graduates receive a diploma containing the seals of both the University of Maryland and its partner institution, the Virginia Polytechnic Institute and State University.

The second type is the research doctorate representing prolonged periods of advanced study. A dissertation that usually

accompanies the study is intended to contribute substantially to the body of knowledge on the subject. The most important of these, the Doctor of Philosophy, no longer has an implication of philosophy for its holder, but represents advanced research in any of the major fields of knowledge. It was first awarded in the United States in 1861 by Yale University. The University of Maryland awarded a Ph.D. for the first time in 1920.

The Master's Degree

The master's degree is an academic honor bestowed upon students who have successfully completed work beyond the baccalaureate.

A thesis and an oral examination are usually required. In 1920, the University of Maryland awarded its first Master of Arts and Master of Science degrees in fields other than agriculture.

The Bachelor's Degree

The bachelor's degree represents the completion of a four-year course of college-level study and is the oldest academic degree awarded by American institutions of higher learning. It was first conferred in America in 1642 on the first nine graduates of Harvard College. Maryland Agriculture College, which later became the University of Maryland, College Park, awarded its first Bachelor of Arts and Bachelor of Science degrees in 1862.

The December 2009 class roster comprises degree candidates from the graduate and undergraduate programs at the University of Maryland, College Park. As final action cannot always be taken for candidates by the time this program is printed, the list of candidates here is tentative. The university reserves the right to withdraw or add names. Diplomas (for other than doctoral degrees) will be mailed by the Office of Records and Registration.

The University of Maryland strives to provide students

with the best educational experience imaginable.

Providing a wide range of enrichment and living and learning programs that cultivate intellectual excellence, it helps students realize their greatest dreams and their full potential. By working with renowned scholars and learning about the world in which they live, students are equipped with the tools to make them influential additions to the community.

CIVICUS

An academic citation program within the College of Behavioral and Social Sciences, centered on citizenship, leadership and community building in a diverse society, scholarship and community service learning. Scholars will be wearing a silver medallion on a blue ribbon.

College Park Scholars

A community of 12 special living and learning programs for academically talented first- and second-year students. Graduating seniors receive an academic citation. Scholars will be recognized with a medallion on a gold ribbon.

Gemstone

Gemstone, within the A. James Clark School of Engineering, is a multidisciplinary four-year research citation program for undergraduate honors students. Faculty and staff guide teams in conducting significant research. Graduates will be wearing a bronze medallion on a red ribbon.

Global Communities

Under the Office of International Programs, students earn a transcript notation of Global Competency through scholarship in the areas of intercultural communication, global issues and international research or service learning. Scholars will be wearing a symbolic globe medallion on a light-blue ribbon.

Jiménez-Porter Writers' House

The Jiménez-Porter Writers' House is a living and learning program dedicated to excellence in creative writing. Students who have received notation in this program will be wearing a bronze medallion with a black and gold ribbon.

Language House

The Language House Immersion Program, created in 1989, gives students who are serious about language learning the opportunity for daily language and cultural immersion in an organized study environment. Graduates will be wearing a bronze medallion on a red ribbon.

Philip Merrill Presidential Scholars

Scholars were nominated by the colleges and represent the university's most successful seniors. The program also honors the university faculty member and K-12 teacher named by each student for their mentorship. Scholars will be wearing red braids on their robes.

Bachelor's degree candidates who have qualified for scholarship honors upon graduation are designated by appropriate symbols adjacent to their names within the alphabetical listing of colleges or schools, pages 30–35 and 53–56.

To be eligible for consideration for such honors a candidate must meet the following general criteria: (1) have completed at least two years of work at the University of Maryland (60 semester hours, 30 of which were earned at the College Park campus) and (2) have a scholastic average of a “B” (grade point average of 3.0) or higher in the University of Maryland work prior to the last semester of registration before the awarding of a degree.

Degree candidates who have met these criteria are shown in the listings as qualifying, upon graduation, for the designations *Summa cum Laude* (if they ranked in the top 2 percent of the candidates in their respective colleges or schools), *Magna cum Laude* (if in the next 3 percent), or *cum Laude* (if in the next 5 percent) based on the grade point averages of students in the preceding three graduating classes of their degree-granting unit.

The Senior Marshal Program began in 1991 as an opportunity to acknowledge outstanding seniors at their commencement. The students selected to be marshals were nominated by faculty, administration and staff for their outstanding accomplishments and contributions to the University of Maryland. We are proud to recognize these truly remarkable students.
